

Supplementary Project Information

Angell Animal Science Building at Essex Agricultural and Technical High School, Danvers, MA

The \$3.6 million project included a 2,500 SF addition to the existing Angell Veterinary Clinic at Essex Agricultural and Technical School. The two-story addition included a kennel room, dog grooming area and two classrooms, expanding the popular veterinary technician program at the growing regional school. The project included extensive site work as the addition was built into the side of a hill adjacent to the existing building and all work was completed during the school year and very close coordination was required between the General Contractor and the school facilities and teaching staff. Also included were new HVAC systems and connections to existing Building Management, Fire Alarm and Fire Protection systems.

Ryan Monks, Director of Facilities, Farm and Ground, (781) 443-5105
