Suresh Bhatia

Project Director / Project Executive

With more than 45 years of experience in the design and construction of public and commercial projects, Suresh brings a global perspective and deep technical expertise to his role as Project Director. His career spans multiple continents and project types, with the past two decades focused primarily on the public sector — including schools, public safety facilities, civic buildings, libraries, parks,

playgrounds, and municipal infrastructure.

Suresh's background as a general contractor, estimator, and Owner's Project Manager provides him with a comprehensive understanding of every phase of project delivery. A respected mentor and leader, he is known for fostering collaboration, guiding teams with clarity and purpose, and empowering others to deliver their best work. His steady leadership and unwavering dedication to client satisfaction consistently bring projects to successful completion — often exceeding expectations and strengthening long-term client relationships.

Jennifer dos Santos

Senior Project Manager

Jennifer brings over 20 years of experience in the design and construction industries, specializing in public sector projects. Before joining ACMI, she spent 14 years with a multi-disciplinary design and project management firm, where she oversaw both design and OPM projects from concept through completion.

Her experience includes serving as Project Manager and Contract Administrator for numerous cities, towns and state agencies and authorities throughout the Commonwealth.

Jennifer is highly skilled in Massachusetts public procurement laws, contract negotiations, budget development, and multi-discipline coordination. Known for her approachable demeanor and trustworthy leadership, she fosters open communication and maintains her clients' confidence throughout every phase of a project. Her commitment to collaboration

and client satisfaction consistently leads to successful outcomes and enduring relationships.

Steven Boucher

Project Representative

Steven brings over 30 years of experience in the construction industry, including extensive work as a site superintendent and self-employed carpenter before transitioning to his role as an on-site project representative. His deep understanding of construction

means and methods, combined with a strong knowledge of Massachusetts State Building Codes and meticulous attention to detail, makes him a trusted presence on any job site.

Known for his practical insight and problem-solving skills, Steven serves as an effective intermediary between contractors, design teams, and owners. His proactive approach to identifying and resolving on-site challenges helps keep projects on track and ensures high-quality results.

2. For the project page: each project's name, brief description, and (if possible) a testimonial or fun fact.

Let's Call these "Highlighted Projects":

Francis M. Leahy K-8. School

A new MSBA-funded K-8 school for 1000 students. The new facility was designed to consolidate the Francis M. Leahy School with the Leonard Middle School in a new state-of-the-art 5 story school building which includes a playground and play structures, basketball court, covered outdoor play space, adaptive PE space and an art room on the roof to maximize the programmable space on a very tight urban site in a densely populated residential neighborhood in Lawrence. The \$115M school was opened for the 25-26 academic year.

John B. DeValles School *(in association with P-Three, Inc.)*

A new MSBA-Funded K-8 School for 1000 students. The new facility features an all-electric, zero fossil fuel design, geo-thermal ground source heat pump heating and cooling, a 690kW photovoltaic array and is targeting LEED Gold Certification. The \$120M dollar facility is expected to realize a 56.6% energy cost savings before renewable energy offsets and, with offsets, is expected to achieve NetZero.

Shaker Lane Elementary, School, Littleton, MA

New 97,000SF +/- MSBA-Funded PreK – 2 School for 500 Pre-K – 2 students. The existing school will be demolished for new fields, separate bus and car drop-offs, and additional parking spaces. The building new building will contain Pre-K - 2 classrooms, team activity spaces, art and music programming, administrative offices, a cafetorium with a stage for performances, a new state of the art media center, and separate play areas for Pre-K and K-2. The school is anticipated to open for the 28-29 academic year.

Angell Animal Science Building at Essex Agricultural and Technical High School, Danvers, MA

The \$3.6 million project included a 2,500 SF addition to the existing Angell Veterinary Clinic at Essex Agricultural and Technical School. The two-story addition included a kennel room, dog grooming area and two classrooms, expanding the popular veterinary technician program at the growing regional school. The project included

extensive site work as the addition was built into the side of a hill adjacent to the existing building and all work was completed during the school year and very close coordination was required between the General Contractor and the school facilities and teaching staff. Also included were new HVAC systems and connections to existing Building Management, Fire Alarm and Fire Protection systems.

Additional Projects (without as much detail as these will take me some time to pull together since they were before I was with Atlantic)

Senior Center Westminster Suresh Bhatia	New Construction of a Senior Center OPM	\$2.75 Mil
Gibbons School Stoughton Suresh Bhatia	Envelope Repairs OPM	\$3.92 Mil
South Elem. School Bellingham Suresh Bhatia	Envelope Repairs OPM	\$1.5 Mil
City Hall, Brockton Suresh Bhatia	Plaza Renovations OPM	\$4.5 Mil
Mulready Elem. School, Hudson Suresh Bhatia	Envelope Repairs OPM	\$1.5 Mil
Town Hall and Senior Center, Dedham Suresh Bhatia	Redevelopment of a Historical Building OPM	\$18.3 Mil

3. A company description, LinkedIn (and other socials), and any mission statement or tagline you'd like featured on the homepage or about page.

On the homepage, please add the tagline: LISTEN closely, LEAD with purpose, and DELIVER with reliability (*I am open to suggestions if you think there is something better*)

About Atlantic

Founded in 2010 by Suresh Bhatia, Atlantic is a certified Minority Business Enterprise (MBE) specializing in Owner's Project Management (OPM) for public sector construction projects across Massachusetts. Our mission is to deliver exceptional OPM services with integrity — ensuring that every publicly funded project is completed on time, on budget, and to the highest standards of quality and transparency.

We have extensive experience with Massachusetts public procurement requirements, having managed taxpayer-funded projects since our inception. Even before founding Atlantic, Mr. Bhatia delivered MSBA/SBA school projects as a General Contractor, providing our firm with a well-rounded understanding of both the owner's and builder's perspectives.

Selecting an OPM is more than hiring a consultant — it's choosing a strategic partner who can integrate community engagement, financial planning, stakeholder coordination, procurement, and long-term project oversight into one cohesive process.

Our leadership team — Project Director Suresh Bhatia and Senior Project Manager Jennifer dos Santos — are career project management professionals with decades of experience guiding complex public projects. Jennifer brings valuable insight from her work in a design, commissioning and project management firm and is especially skilled at building trust and consensus among diverse stakeholder groups, from municipal leaders to community members.

At Atlantic, we focus on what we do best: leading the process, managing the team, and protecting our clients' interests. Free from conflicts of interest, our approach is collaborative, transparent, and driven by results.

We believe successful projects are built on trust, integrity, and partnership — values that guide every project we deliver and every relationship we build.
